## Harro Höfliger celebrates 20 years of special purpose aseptic machinery

Harro Höfliger is celebrating 20 years of building special purpose and bespoke machinery for pharmaceutical sterile applications. It now stands as one of the biggest sectors of the company's business; 80% of its turnover coming from special one off and short series bespoke machinery.

Over the years, equipment had been designed and built for such applications as

- Depot and implant syringe loading, checking and assembly
- Needle free syringe assembly
- Double chamber syringe assembly.
- Needle stick guard assembly.

Toollessly removable gripper

Distance to deckplate

Integrated sensors

Assembly in sterile demands uncompromising build standards

Sterile assembly machinery

Aseptic drug delivery filling and assembly machinery

Aseptic liquid and powder filling and assembly machinery

Sterile depot and implant assembly machinery
